?

Librarian

Farmer

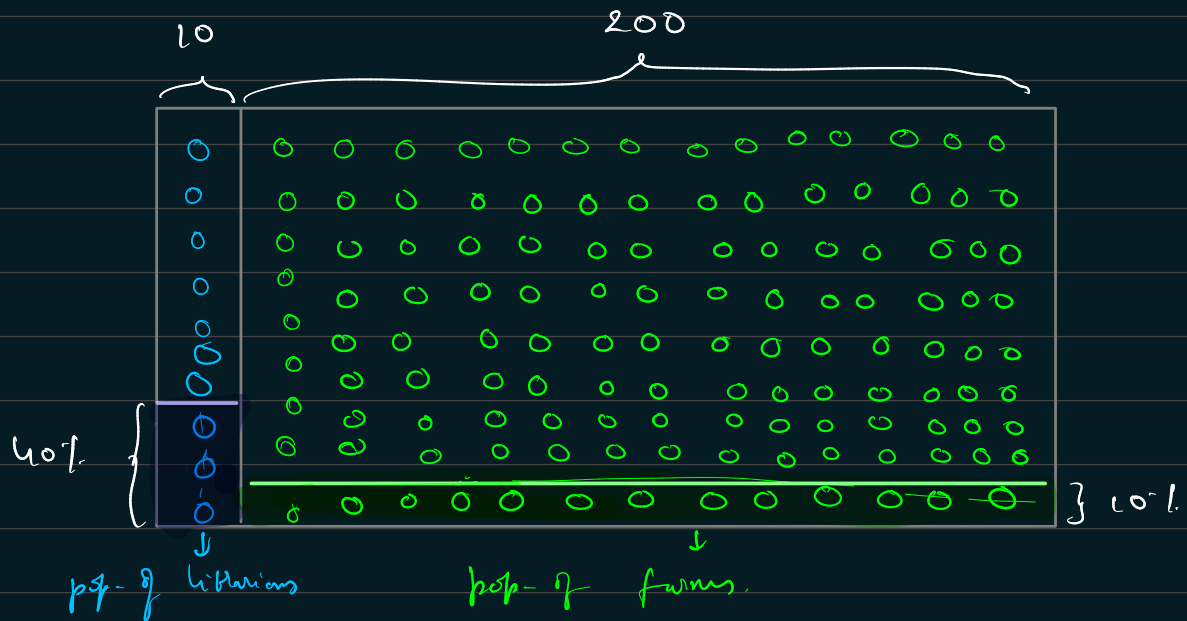

irrational choice

(stereotype)

choosing lib over farmer usually doesn't ^{Consider to} account the
pop. of libr vs farmers

for Nf :- Consider farmer to librarian ratio is 20:1

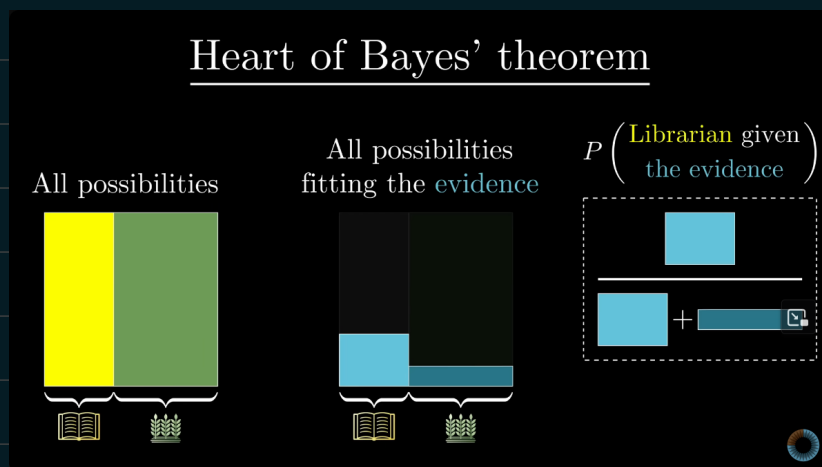

→ If 'tidy & meek' description of Stone would fit 40% of librarians & 10% farmers.

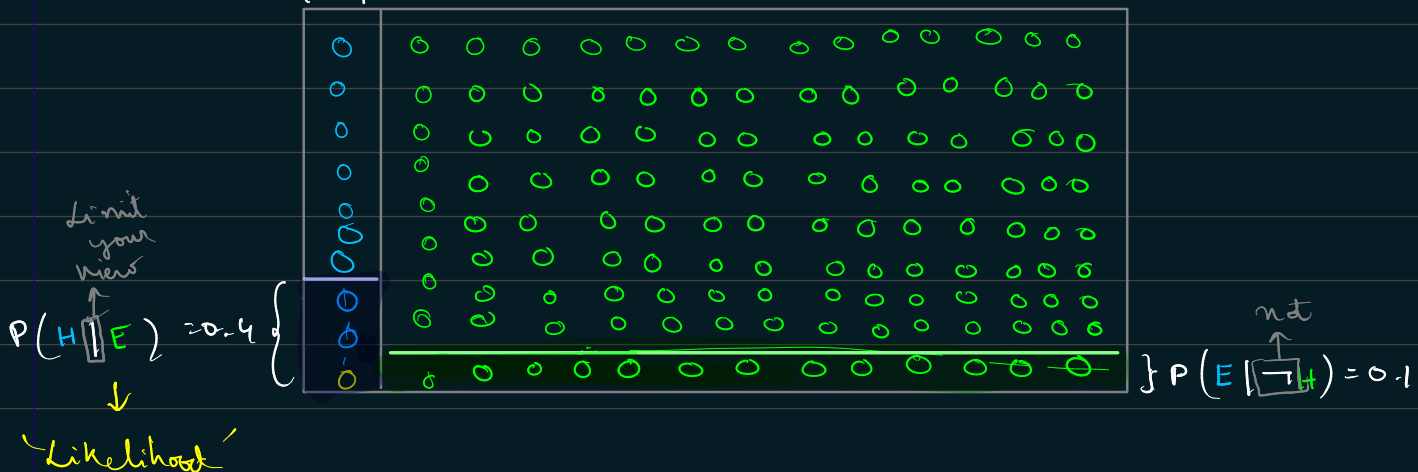

$$\Rightarrow 40\% \text{ lib} = 4$$

$$10\% \text{ farmers} = 20$$

$$P(\text{lib given description}) = \frac{4}{4 + 20} = 16.7\%$$

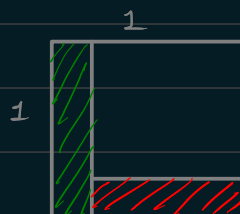

Prior $\leftarrow P(H) = 1/21$

$P(H|E) \rightarrow P(\text{Hypothesis given evidence})$

$P(H|E) = \frac{P(H) P(E|H)}{P(H) P(E|H) + P(\neg H) P(E|\neg H)}$

$P(H|E) = \frac{P(H) P(E|H)}{P(E)}$

$= \frac{\text{Area of green block}}{\text{Area of green block} + \text{Area of red block}}$

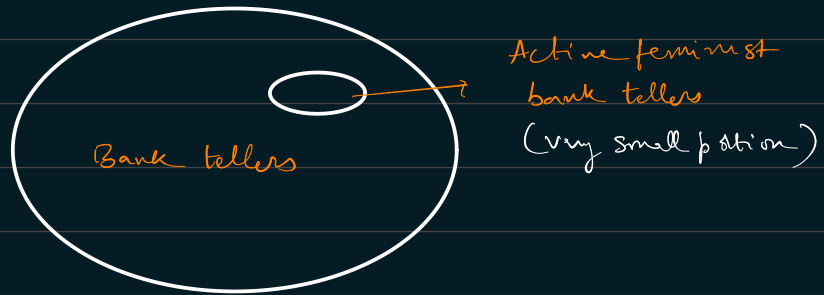

Linda is 31 years old, single, outspoken, and very bright. She majored in philosophy. As a student, she was deeply concerned with issues of discrimination and social justice, and also participated in anti-nuclear demonstrations.

- a) Linda is a bank teller.
- b) Linda is a bank teller and is active in feminist movement.

Which option most likely describe Linda?

b) Linda is a bank teller and is active in feminist movement.
